

ASX ANNOUNCEMENT
17 August 2015

Crown Resorts contract with dorsaVi to establish best practice in workplace safety

Key Points:

- **Contract is the largest commercial project signed by dorsaVi and represents revenue over 18 months**
- **Crown Resorts is a repeat customer with projects expanding in scope and commercial value**

Melbourne, Australia – Monday 17 August, 2015: Medical device company dorsaVi Ltd (ASX: DVL) today announced the signing of its fourth contract with Crown Resorts. This latest contract positions Crown strongly as a global leader in workplace safety.

The contract represents dorsaVi's largest commercial project to date and will be implemented over 18 months with an additional annual annuity in the form of a license fee for ViSafe.

dorsaVi's ViSafe™ workplace solutions will efficiently assess the movement of Crown's workers across Melbourne and Perth, to build a dedicated occupational health and safety (OHS) database and job analysis library. From there, the company can see how its workers are moving, identify higher risk areas of work and proactively manage this to create a safer working environment.

Crown will be implementing dorsaVi's ViSafe™ program across all business areas in both Melbourne and Perth, and plans to implement a similar program at the new Sydney site within two to three years.

Crown's Group Manager of Health Safety and Wellbeing, Tony Graham said: "The safety of Crown workers is paramount and dorsaVi's ViSafe revolutionary technology provides the business with an easy and efficient way to understand the workplace risks and proactively manage it across the two properties."

"By having a better view of how our employees move, across roles and businesses, we will not only be able to create a safer workplace, but we will also be able to reduce costs and improve work practices."

Andrew Ronchi, CEO of dorsaVi, added: "Crown has a reputation for its innovative approach to creating a world class facility and workplace for its more than 13,000 employees across Melbourne and Perth. Crown's vision for safety in the workplace shows leadership in its industry at a national and international level."

"The signing of this latest contract with Crown is a significant milestone and highlights the forward-thinking nature and value that Crown places on best-practice OHS. The contract is one of more than a dozen signed over the last six weeks in OHS and it is pleasing but not unexpected that we are seeing an acceleration in sales with new and existing customers across the globe."

For personal use only

dorsaVi's ViSafe™ workplace solutions brings ViSafe wearable technology, sensors and mobile app technology together to help organisations track and analyse the movement of their workers to assess and manage risk. Its revolutionary wearable sensors – the size of a small USB - attaches to any part of a person's body to objectively measure human movement, assess the level of risk associated with that movement and turn it into actionable data.

About dorsaVi

dorsaVi (ASX:DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety, and clinical applications. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** ViMove is transforming the management of patients by providing objective assessment, monitoring outside the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practices in Australia and the United Kingdom and is now available in the United States following FDA 510(k) clearance.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used by AFL and NRL clubs in Australia, clubs in the Barclays Premier League, Australian and Victorian Institutes of Sport, various Olympic teams and athletes internationally, and Cricket Australia.
- **OH&S:** We combine innovation, measurement and quality to reduce workplace incidents, costs, meet compliance and improve brand reputation. ViSafe enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. ViSafe has been used by major corporations including Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton. Australian Workplace Compliance delivers risk mitigation through compliance to OHS, Quality Management Systems, Company Policy and Process.
